

International Telemetry Conference 2015

35th ICTS General Session Agenda

ITC Session 9, Bronze Room 3, 28 OCT 2015, 0830-1200

The ICTS, founded in 1999, is a non-profit organization sponsored by the International Foundation for Telemetry. The ICTS was formed to facilitate international information exchange between telemetry practitioners and promote the benefits and enhancement of the electromagnetic spectrum for telemetry applications, especially Aeronautical Mobile Telemetry (AMT). The ICTS has enjoyed notable success in both augmenting telemetry spectrum plus raising the awareness of, and resistance to, spectrum encroachment problems directly affecting the telemetry user community.

1 *Welcome and Introduction* J.-C. Ghnassia

2 *Regional Reports: R-I (Europe/Africa)* G. Mayer
R-II (The Americas) M. Ryan
R-III (Asia/Pacific) D. Ernst

(The Regional Reports above will be 20 minutes apiece,
the five Presentations below 30 minutes apiece)

3 *“The U.S. Flight Test Perspective on the 2015 World
Radiocommunication Conference”* K. Keane

4 *“How Brazil’s ANATEL is Dealing With New Potential Threats
to Telemetry Spectrum”* L.F. de Souza

5 *“Encroachment Threats to Aeronautical Telemetry in the USA:
Update #11”* S. Hoschar

6 *“The Potential for Aeronautical Mobile Telemetry in the Ku-,
K- & Ka-Bands”* G. Mayer

7 *“C-Band Status and Future Wireless Needs at Airbus”*
G. Freaud

8 *Conclusion and Closure* J.-C. Ghnassia
